

The Clinical Research Network (CRN) offers dedicated space and high quality research nursing, lab, bionutrition, and exercise physiology services at a reasonable cost. The CRN supports studies funded by federal agencies, industry sponsors, and foundations/associations.

Investigators from Emory University, Morehouse School of Medicine, Georgia Institute of Technology, Children's Healthcare of Atlanta, and the University of Georgia are eligible to request CRN support.

Please contact us to see how we may be able to support your research.

ACTSI's Clinical Research Network supports investigators to conduct clinical and translational studies that advance the understanding, prevention, and treatment of human disease.

For students and health sciences trainees, these units provide unique opportunities to learn how laboratory discoveries are translated into improved patient outcomes.

Clinical research and education may be conducted across our state-wide clinical research network and nationally through other CTSA Hubs.

**MAKING RESEARCH A LITTLE BIT
EASIER THROUGH GREAT SERVICE BY
SKILLED PROFESSIONALS**

To learn more about the Clinical Research Network and how we can help turn your ideas into research, visit us at:

www.actsi.org/discovery

ACTSI is supported by a grant from the NIH/National Center for Advancing Translational Sciences (NCATS) (UL1TR000454).

WHO ARE WE?

The Atlanta Clinical & Translational Science Institute (ACTSI) Clinical Research Network (CRN) facilitates high-quality research, thus ensuring that patients can benefit from new and better treatments. We help researchers set up clinical studies quickly, support the life-sciences industry to deliver their research programs, provide health professionals with research training, and work with patients to ensure their needs are at the very center of all research activity.

CLINICAL SITES:

- Emory University Hospital
- Grady Memorial Hospital
- Emory University Midtown
- Morehouse School of Medicine
 - University of Georgia
- Children's Healthcare of Atlanta

SERVICES

NURSING

- Medication administration
- IV access and infusions
- Routine and complex vital sign monitoring
- Admission and shift assessments
- PK sampling
- Phlebotomy training
- Telemetry monitoring
- Protocol order set compilation

LABORATORY

- Sample processing to fit protocol needs
- Short- and long-term sample storage
- Barcoding and tracking of biosamples
- Shipping of samples for analyses
- DNA extraction
- Training in Good Laboratory Practice (GLP)
- After-hours processing available upon request

BIONUTRITION/EXERCISE PHYSIOLOGY

- Bone density and body composition (iDXA)
- Exercise treadmill testing
- Energy expenditure measurements
- Dietary intake assessment
- Feeding studies
- Experienced research nutritionist

STUDY DESIGN

- Studio consultation with senior investigators for development, design, and conduct of protocols
- Biostatistical support and DSMB creation
- Study subject recruitment and retention

PROGRAM DIRECTORS

Emory University Hospital
Thomas R. Ziegler, MD

Grady Memorial Hospital
Guillermo E. Umpierrez, MD

Emory University Hospital Midtown
Greg S. Martin, MD, MSc

Morehouse School of Medicine
Priscilla S. Johnson, PhD, MSN

University of Georgia
Bradley G. Phillips, PharmD

Children's Healthcare of Atlanta
