

Ensuring **Success** of Point of Care Technologies with a Systems Engineering Approach

Medical technologies do not exist in isolation. In order for them to be successful, they need to operate as part of a larger care system.

We invite you to join us for a webinar on how a Systems Engineering approach to developing disruptive point-of-care technologies can help overcome the many barriers to successful clinical adoption.

RSVP Now

Speaker

James Stahl, MD, CM, MPH
Health Outcomes Researcher
Dartmouth-Hitchcock Medical Center and
Massachusetts General Hospital

with commentary from Johns Hopkins Applied Physics Laboratory

When: February 26, 2019

Time: 2pm EST

A webinar link will be sent to all registrants.

This webinar is designed by the NIH Point of Care Technology Research Network (POCTRN) to provide relevant information to stakeholders interested in point-of-care technology research and development. POCTRN's goal is to develop technologies with clinical applications using a network model that enhances complementary strengths and builds multidisciplinary partnerships.
