

With support from CLIC, the NUCATS Institute at Northwestern University in Chicago is hosting an **Un-Meeting on Lifespan and Life Course Research: Integrating Strategies** on Monday, March 2, 2020, with a welcome reception Sunday evening. The aims of this un-meeting are to:

- Promote study design, recruitment, enrollment and retention strategies to enroll populations representative of people who can benefit from research findings and implementation of ways to improve health and treat disease;
- Explore and disseminate strategies for optimal study design and implementation for life course research; and
- Share new ideas and promote new collaborations within and between life course and lifespan research domains.

We are thrilled to welcome representatives from every CTSA hub to Chicago for this robust dialogue about effective strategies for engaging in research across the lifespan and life course. Would you please share this information, including the following travel stipend nomination and registration links, with interested individuals at your hub. As one component of the un-meeting, we will highlight TL1 scholars' projects in the context of lifespan and life course research, so please do loop in your TL1 PI and consider nominating a TL1 scholar for a travel stipend. The un-meeting is open to all CTSA members, community partners, and subject matter experts. Although hubs may only nominate one person for a travel stipend, we welcome multiple representatives from each hub to register for and attend the un-meeting.

**We hope to receive all travel stipend nominations and registrations by January 15, 2020.**

- Travel Stipend Nominations (each hub may nominate one individual): <https://redcap.nubic.northwestern.edu/redcap/surveys/?s=3F4KFYRWRJ>
- General Registration: <https://redcap.nubic.northwestern.edu/redcap/surveys/?s=33MPA9K49P>
