

Bring the Power of CRISPR to Your Research

EMORY
UNIVERSITY

Emory Integrated
Core Facilities

September 2, 2020 1:00 PM – 2:30 PM
Georgia Virtual Seminar

Join us to learn more about the easiest way to start using CRISPR in your research. See how your lab can use genome engineering to drive your research forward and accelerate discoveries with full support through the Emory EIGC Core and Synthego Partnership.

Register today for our virtual seminar to learn how you can best utilize Engineered Cells in your research and guaranteed solutions from Synthego.

- Guaranteed CRISPR KO Cell Lines
- Knock-Ins, Gene Tags, SNPs and Advanced Editing
- Immortalized Cells, Primary Cells, iPSCs and more
- Fastest Path to Use CRISPR in Your Research

Space is limited, please register.
