Dear Georgia CTSA Supported Investigator,

As a recipient of support from the Georgia Clinical & Translational Science Alliance (Georgia CTSA), the National Institutes of Health's (NIH) funded Clinical and Translational Science Award, you are subject to the NIH Public Access Policy and must cite the Georgia CTSA grant number in all products including presentations, publications, and patent applications.

Please cite all your work as follows:

*Supported by the National Center for Advancing Translational Sciences of the National Institutes of Health under Award Number UL1TR002378*

Citing the Georgia CTSA is a key metric used within our alliance and the NIH to evaluate and document the impact of our support of your research. Your cooperation is critical to our continued funding and success. Please double check the award numbers before submission.

More information on when and how to comply with the NIH Public Access Policy may be found here: <https://publicaccess.nih.gov/>

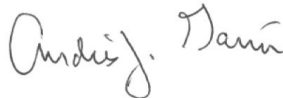

Please contact Eric Nehl at [enehl@emory.edu](mailto:enehl@emory.edu) or 404-727-9445 for additional assistance.

Finally, thank you for giving us the opportunity to support you and your clinical and translational science pursuits. We are grateful for the opportunity to assist you.

Sincerely,

W. Robert Taylor, MD, PhD  
Principal Investigator  
Emory University

Andres J. Garcia, PhD  
Principal Investigator  
Georgia Institute of Technology

Elizabeth O. Ofili, MD, MPH  
Principal Investigator  
Morehouse School of Medicine

Bradley G. Phillips, PharmD  
Principal Investigator  
University of Georgia

Supported by a grant  
from the NIH/National  
Center for Advancing  
Translational Sciences  
(UL1TR002378)
