The **Georgia Clinical & Translational Science Alliance** (Georgia CTSA) is one of over 50 in a national consortium striving to improve the way clinical and translational research is conducted across the country. The consortium shares a common vision to train the next generation of clinical investigators, translate laboratory discoveries into treatments for patients, and engage communities in clinical research efforts.

Georgia CTSA provides:

- Research education and career development
- Mentoring, collaboration, and team science assistance
- Funding opportunities
- Expert consultations and services in the fields of biostatistics, epidemiology, informatics, ethics, and regulatory knowledge
- Clinical research support for adults and children
- Assistance with multi-site clinical research
- Community engagement and partnership including recruitment and integrating special populations
- Support with translation of ideas from concept to practice

Supported by the National Center for Advancing Translational Sciences of the National Institutes of Health under Award Number UL1TR002378
