2021 S10 Grant Program Announcements

The Emory Integrated Core Facilities (www.cores.emory.edu) desire to aid investigators apply for S10 grants to obtain cutting-edge platforms that can be housed and supported within an existing core facility. The two NIH program announcements are listed below:

Shared Instrumentation Grant (SIG) Program

<https://grants.nih.gov/grants/guide/pa-files/PAR-19-179.html>

High-End Instrumentation (HEI) Grant Program

<https://grants.nih.gov/grants/guide/pa-files/PAR-19-177.html>

To aid investigators, the EICF will:

1. Assist with identifying major users of the equipment at Emory and at our Georgia Core Facilities Partnership (GCFP) universities (<http://www.cores.emory.edu/georgia-partners/>).
2. Provide grant text that addresses the Administration (Organization / Management Plan) and Institutional Commitment for the platform to be within one of the Emory Integrated Core Facilities.
3. Review and edit the grant application
4. Draft a letter of support that describes the institutional support for the platform.

Deadlines:

1. April 1, 2021: Email Mike Zwick (mzwick@emory.edu) and Nicole Tharp (nicole.c.tharp@emory.edu) the proposed platform and an initial list of major/minor users.
2. May 1, 2021: Email Mike Zwick (mzwick@emory.edu) and Nicole Tharp (nicole.c.tharp@emory.edu) a complete draft of the grant application.
3. June 1, 2021: Grant Submission Deadline to NIH

Please contact Mike Zwick (mzwick@emory.edu) with any questions.

Michael E. Zwick, PhD
Associate Vice President for Research
Woodruff Health Sciences Center
Professor
Departments of Human Genetics and Pediatrics
Associate Dean of Research
