

RESEARCH INNOVATION SUPPORT AND ENHANCEMENT (RISE) PILOT GRANT OPPORTUNITY

APPLICATIONS DUE
NOVEMBER 15, 2024

The Center for Children's Health Assessment, Research Translation, and Combating Environmental Racism (CHARTER) is pleased to announce the 2025 Research Innovation Support and Enhancement (RISE) Pilot Program in Children's Environmental Health Research. RISE Grants support research in the environmental health sciences that aligns with the mission of NIEHS. RISE Grants must be used on the production of new, focused, preliminary data, or the analysis of data to support grant submission. All applications must focus on the role of the **children's environmental health**.

WHO CAN APPLY?

Investigators from CHARTER's partner institutions (Spelman and UGA) and partner organizations will be eligible to apply if their project is aligned with the goals of CHARTER. Applications will receive priority for review and funding if they are 1) from non-Emory partner institutions representing groups that have been historically excluded from academic research, 2) early stage, meaning the investigator graduated from a residency training or terminal degree program within the last 10 years, and/or 3) led by a new investigator, or one who has not yet received substantial, independent funding from NIH.

PILOT PROGRAMS:

Funding of up to \$12,000 direct costs may be requested. RISE grants are expected to lead to K-or-R level NIH funding, preferably with NIEHS. RISE grantees will be paired with a faculty member who can assist the investigator in achieving the goals of their pilot, as well as in the development of the resulting funding application.
