

Community Engagement Program Presents:
**2024 TRANSLATION RESEARCH TO PRACTICE
WEBINAR SERIES**

SESSION 4: POLICY AND ADVOCACY 101

WEBINAR OVERVIEW:

In this webinar, we will explore strategic approaches to effective advocacy and initiatives that are driving meaningful change in public health policy. It is specifically designed for both beginners and experienced advocates to enhance capacity at global, national, and local levels, with a special focus on low-resource settings. Participants will acquire tools to effectively engage with elected officials and decision-makers. Don't miss this opportunity to deepen your understanding and make an impact!

ABOUT US:

The Georgia Clinical & Translational Science Alliance (Georgia CTSA) is an inter-institutional magnet that concentrates basic, translational, and clinical research investigators, community clinicians, professional societies, and industry collaborators in dynamic clinical and translational research projects. Emory engaged three of its close academic partners - Morehouse School of Medicine (MSM), Georgia Institute of Technology (Georgia Tech), and the University of Georgia (UGA) - to form the Georgia CTSA. This partnership, a strategic multi-institutional alliance, offers compelling, unique, and synergistic advantages to research and patients statewide. The Community Engagement program supports community-university research partnerships, obtains community input into university research, and increases health research in community settings that is responsive to the health needs of the community.
