

## **Ethics & Regulatory**

This program provides ethics and regulatory knowledge infrastructure and support for clinical and translational investigators. The program helps to centralize and consolidate research support infrastructure at Emory University, Morehouse School of Medicine, and Georgia Institute of Technology. The Ethical Dilemmas in Scientific Research and Professional Integrity website—[www.actsi.org/ethics](http://www.actsi.org/ethics)—also presents case scenarios involving responsible conduct in research and expert resolutions.

### **Available Resources:**

- Investigator and protocol support for regulatory affairs
- Investigator and institutional conflict of interest assistance
- Complex Internal Review Board issue resolution
- Coordination of multiple committee approvals
- Consultation on intellectual property issues and conflicting institutional policies
- Safety surveillance and support
- Financial and research compliance
- Quality assurance
- Adverse event database
- Training and education programs for investigative teams
- IRB reciprocity, Memorandum of Understanding, and Material Transfer Agreements with each ACTSI partner institution
