Dear Georgia CTSA-supported trainees (KL2 Scholars, TL1 Trainees, MSCR and CPTS students),

As recipients of support from the Georgia Clinical & Translational Science Alliance (Georgia CTSA), the National Institutes of Health (NIH)-funded Clinical and Translational Science Award, we are required to ensure compliance with the NIH Public Access Policy. To adhere to these NIH policies, please be sure to cite the appropriate Georgia CTSA grant number(s) in all of your publications, presentations, and other research products. Proper citation is not only a requirement—it is also an essential component in helping NIH assess the impact of Georgia CTSA's research and research training programs and ensuring future funding.

Please cite your work as follows:

Supported in part by the National Center for Advancing Translational Sciences of the National Institutes of Health under Award Number UL1TR002378

KL2 Scholars should also cite: KL2TR002381

TL1 Trainees should also cite: TL1TR002382

It is fine to also cite other grants that supported your research or research training, but it is essential that you include the appropriate Georgia CTSA grants.

Georgia CTSA supported publications must also follow the **NIH Public Access Policy**. All publications supported by NIH funds are required to be submitted to PubMed Central (unless already done by the journal). Alexey Kurbatov (akurbat@emory.edu) in the Georgia CTSA Research Education Program Office will submit your accepted manuscripts to PubMed Central to ensure compliance with NIH policy.

Thank you for your cooperation and continued dedication to advancing clinical and translational science.

Sincerely,

Henry M. Blumberg, MD
Professor of Medicine (Infectious Diseases), Epidemiology, and Global Health
Emory University School of Medicine and Rollins School of Public Health
Director, Clinical and Translational Research Training Programs
MPI, NIH-funded Georgia CTSA KL2 and TL1 awards

Vasiliki Michopoulos, PhD, MSc
Associate Professor of Psychiatry and Behavioral Sciences
Emory University School of Medicine and Emory National Primate Research Center
MPI, NIH-funded Georgia CTSA TL1 award

Supported by a grant
from the NIH/National
Center for Advancing
Translational Sciences
(UL1TR002378)
