

Have you had COVID? Participants needed for Research Study

Scientists at Emory University are interested in unlocking how the bacteria in the gut can impact symptoms after COVID-19 infection. **Do the bacteria in the gut affect whether you develop long COVID?**

We are Recruiting Patients who:

- Were diagnosed with COVID-19 infection in the past 3 months: confirmed by PCR or rapid antigen testing
- Are at least 18 years of age
- Have not recently taken any antibiotics in the past 3 months
- Would be willing to donate a single stool sample

If you Participate in this Study you will:

- Be asked to complete a questionnaire about your health and current symptoms
- Be asked to record your diet for a few days
- Collect a single stool sample
- Be compensated for your time

Where will this research take place?

- The questionnaire will take place at the clinic or over the telephone based on participant preference
- You will work with our courier service to get the stool sample to us which will be collected in the comfort of your home

The Researcher Conducting this study is Dr Colleen Kraft. Our team can be contacted at: 470-839-5804
