Volunteers Needed for Research on Veterans' Health

Prevention and Risk Evaluation for Vascular Health,
Alzheimer's Risk, Intervention, and Lifestyle

This observational study looks at the relationship between military service exposures and health-related outcomes in military veterans.

You May Qualify If You:

- Are a US Military veteran
- Have normal cognition or minor memory problems
- Are willing to complete study procedures
- Complete eligibility phone screen and brief memory screening

Participation Involves:

- 1 in-person study visit that will last 3 hours
- Blood draw
- Vascular ultrasound
- Memory tests
- Questionnaires
- Wearing a wristwatch to track sleep and movement for 30 days

Participants will be compensated \$100 for completing the study.

Location: Emory University
School of Nursing, Atlanta, GA
