

# Georgia CTSA

Clinical Research Centers (GCRCs)

## Who We Are

The Georgia CTSA Clinical Research Centers (GCRCs) offers a dedicated space, experienced research staff, and resources including nursing services, core laboratory services, and bionutrition unit services to support research at a competitive cost.

## Who We Serve

Investigators from Emory University, Morehouse School of Medicine, Georgia Institute of Technology, Children's Healthcare of Atlanta, and the University of Georgia are eligible to request support.

## Services We Offer

### Nursing Services

- IV access and infusion of experimental therapeutics
- Pharmacokinetic studies
- ECG services and cardiac services
- Assistance with medical procedures (LPs, biopsies, and bone marrow aspirations)
- Blood glucose monitoring

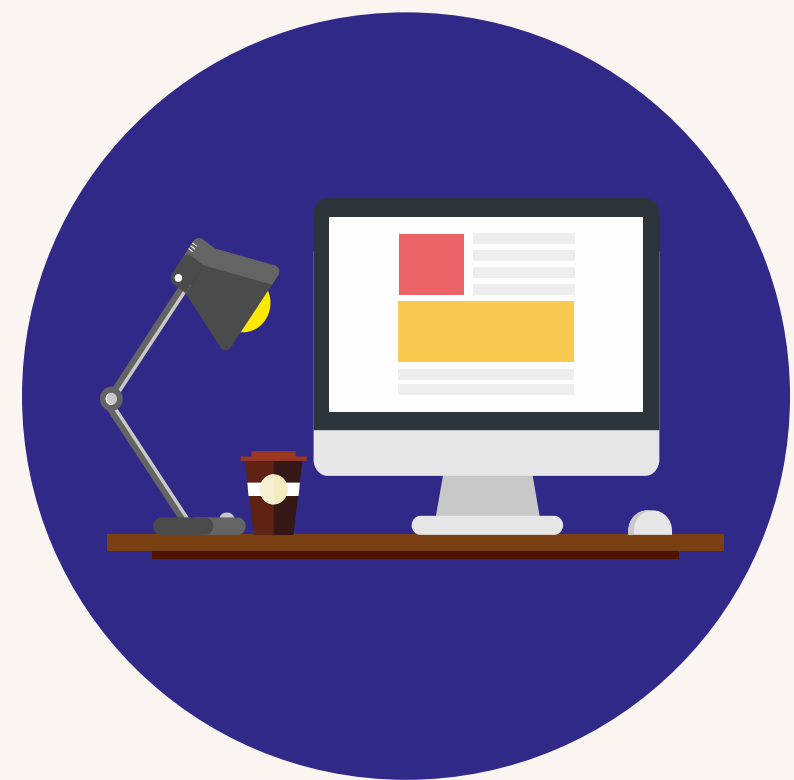

### Laboratory Services

- Custom sample processing and storage
- Biosample barcoding, banking, and tracking
- DNA extraction
- Freezer storage

### Bionutrition Services

- VO2 Max testing
- Bone density and body composition (iDXA, Bod Pod, and BIA)
- Dietary intake analysis
- Research meal and supplement preparation

### Additional Services

- Phlebotomy training
- Protocol development
- Subsidies for qualifying studies
- Coordinating services
